Engineering Design Technologies (EDT) Founded in 1993, the firm is a minority-owned business headquartered in Metro Atlanta. A fully integrated engineering and design-build firm, EDT is a front-runner in the industry and employs over 100 professionals with expertise in engineering/architectural design, BIM coordination and construction. Initially founded as an engineering firm, EDT has expanded to respond to changing market conditions and provide the flexibility mandated for timely response to clients' needs.

This expansion of services includes a vibrant design-build practice with the introduction of EDT-THA, a full service architectural design firm and EDT Constructors, which offers a full range of construction services. Also we offer real estate development services, design-build lease-back options, water resources management and other turnkey services. EDT is proficient in streamlining processes while providing comprehensive, quality-proven solutions that exceed client expectations.

What others have said

“Their team has the ability to understand the objectives and priorities and make positive, quality contributions to planning, design, configuration and construction. They have been a real pleasure to work with and regularly have gone above and beyond the “call of duty” to ensure success for DC Water. I have also found them to be honest, fair and equitable when dealing with the inevitable project changes.”

Gert van der Walt, PE - Planning Supervisor
District of Columbia Water & Sewer Authority

“It has been my privilege to work with Mr. Hassan Anvari and EDT Constructors during the last year and a half. EDT has acted as Construction Management consultant...Mr. Anvari’s energetic and proactive efforts have been a big part of the success we have experienced...”

Charles Radebaugh, RA - (former) Project Administrator
Fulton County Schools

“Thank you and your team for doing such a fine job in putting together a fine design development submittal for Bellsouth and Carter & Associates. Please extend our appreciation also to your team members that worked for us on some tight deadlines.”

Jeffery L. Robinson NOMA AIA - Vice President
J.W. Robinson & Associates

“...EDT successfully completed ...work in a timely fashion. As Director of Project Management for Fulton County, I am pleased to recommend EDT for construction and professional engineering services. EDT has successfully delivered contracted scope of work with a quality product, on-time and within budget.”

Michael Katzin AIA - (former) Assistant Director
General Services Department, Fulton County

“Their team has the ability to quickly understand project scopes, budgets and priorities and they organize themselves so as to make positive, quality contributions to the project team. The quality of their work has been recognized and appreciated by our clients, and other team members. I would recommend the addition of the Engineering Design Technologies, Inc. team to any corrosion engineering or water infrastructure project or program as they will immediately add value.”

Craig Daly, PE - Senior Program Manager
Pure Technologies

“EDT project superintendent and jobsite foreman took direct ownership during construction of the facility. The quality of construction was the direct result of their coordination of subcontractors and attention to detail. The leadership and personal involvement of Fred Fatemi and Hassan Anvari kept the project on track and relationships in balance. We look forward to future contracts with EDT as Fort Benning transitions into the ‘Maneuver Center of Excellence.’”

Mary Corbin - Contracting Officer
U.S. Army Corps of Engineers, Savannah

“EDT did an excellent job on the Design-Build Ocee Library project, now known as Dr. Robert E. Fulton Regional Library. EDT provided high performance, energy efficient and environmentally friendly upgrades to make this project a “Green” building that now qualifies for LEED® EB by the US Green Building Council. This project received a high grade for superior indoor air quality by Air Quality Science, an ISO 140001 accredited firm. This project was featured in the Environmental Design and Construction Magazine on January 10, 2005.”

Belinda Morrow - Project Manager
2M Design Consultants
