Government/Veterans Affairs

BRAC Dormitory, Moody Air Force Base

TBUP Barracks Renovations

VA Oakwood Outpatient Clinic

Finding ways to incorporate best practices, such as reducing its footprint, designing office space that is more open to a collaborative environment approach, using modular furniture and wall systems help professional, medical and administrative functions to possess a flexibility that is mandated in today's market.

Engineering Design Technologies is at the forefront of design for both military and agencies associated with our service men and women, such as the U.S. Department of Veterans Affairs. We have extensive experience in traditional design-bid-build and especially in design-build of medical office buildings, service centers, maintenance, buildings, grounds service and warehouse/storage facilities.

EDT assists all government entities in finding new ways to improve access and operational efficiency through our extensive construction and design experience and lessons learned. We evaluate techniques being used in the private market and at the federal level. Select project experience includes:

- VA Austell Primary Care Clinic | Atlanta, GA
- VA Oakwood Outpatient Clinic | Oakwood, GA
- BRAC Dormitory, 120-PN Moody Air Force Base | Valdosta, GA
- TBUP Barracks Renovation, FY11, FY12, FY13, FY14 | Fort Gordon, GA
